

1 Mont Vernon School Board

2 Tuesday, August 24<sup>th</sup> 2021

3 Meeting Minutes- Approved 09 14 2021

4 Attendees:

5 Administrative Team: Adam Steel- Superintendent, Christine Landwehrle- Assistant  
6 Superintendent, Amy Facey- SAU #39 Business Administrator. Meg Beauchamp- Director of  
7 Student Services, Thomas Lecklider- Principal MVVS. Roger Preston- Director of Facilities and  
8 Edmundo Martinez- Technology Department

9 Mont Vernon Village School Board: Chair- Sarah Lawrence, Vice Chair- Peter Eckhoff,  
10 Secretary- Jessica Hinckley, Kristen Clark and Stephen O'Keefe.

11 Board Minutes: Danae A. Marotta

12 Public: (In order of speaking) Corey Komeczka, Mont Vernon, NH, Ana Barrett, Mont Vernon  
13 NH, Ally Norman, Mont Vernon NH, Matthew Black, Mont Vernon NH, Andrew Stokinger,  
14 Mont Vernon NH, and George Torres, Mont Vernon NH,

15 I. Call to Order

16 **Chair of the Mont Vernon School Board, Ms. Sarah Lawrence, called the meeting to order**  
17 **at 6:01PM.**

18 II. FY 22' Reopening Plan

19 She explained that the SAU Board adjusted the plan at the recent SAU Board Meeting on  
20 Thursday, August 19<sup>th</sup>. They recommended passing it down to the individual boards. The  
21 Amherst School Board has met, and Souhegan Cooperative School Board is meeting on  
22 Thursday.

23 She asked Superintendent, Mr. Adam Steel, for a brief overview.

24 Mr. Steel noted that this year's plan is similar to last year's plan with 5-color coded statuses,  
25 red, orange, yellow, green and blue status levels. It is based on several metrics to help them  
26 decide what status they will be. The most important metric are the cases in the school, the next is  
27 the availability of vaccination, rate of active cases in the town per 100,000. This measures how  
28 many cases are in the town of Mont Vernon. The next one is the test positivity rate by public  
29 health region for antigen and PCR tests, and then vaccination rate by town.

30 In Mont Vernon as of yesterday, there are no cases of Covid- 19. Which means there are no cases  
31 in the school. Vaccination availability is not available to the students in the school. The rate of  
32 active cases per 100,000 in Mont Vernon is in the blue status. The test positivity rate by public  
33 health region is also 6.5% and the vaccination rate by town is just under 52 %. He suggested that  
34 they start school in the yellow status level, mostly because of vaccination availability. One could  
35 argue with those metrics that Mont Vernon could start in the green status. He recommended the

36 yellow in case there are run on cases in the school and then reevaluating and changing to green  
37 status.

38 The difference between the different status levels boils down to the most common topic, the use  
39 of indoor masks. The yellow and orange status required the use of indoor masks. The SAU board  
40 voted to remove indoor masks in the yellow status. If adopted by this board, starting in the  
41 yellow status would not require the use of indoor masks. There are several other interventions  
42 and mitigation factors. The most important one is if students and families are not comfortable,  
43 they are partnering with VLACS. They are offering courses and be supported by a local  
44 interventionist. They will still remain connected to the MVVS. Those are the highlights and he  
45 will be happy to answer any questions.

46 Ms. Lawrence asked for board questions.

47 Mr. O'Keefe requested public comments.

### 48 III. Public Comment I of II

49 Ms. Lawrence noted that there is a process for commenting to the board. You are allotted 3  
50 minutes for comments. If there is time, you may come back for a second comment. The process  
51 is not a dialogue, it is the public stating their comments to the board. They will not be able to  
52 answer questions but take it under advisement.

53 Mr. Corey Komeczka, Mont Vernon, NH, noted that his daughter is a student here at the MVVS.  
54 He thanked the board and teachers for keeping the students safe. There is one thing that everyone  
55 can agree on and that is that masks are a divisive topic. Anyone can look online and find  
56 information about masks. They are not experts and it is difficult to know. The opinion of experts  
57 should weigh a lot heavier. Yes, it is a free country but when you are in a shared space it is the  
58 school's job to keep the children safe. In his opinion, they should start with masks. They should  
59 do everything in their power not to let children get sick.

60 Ms. Ana Barrett, Mont Vernon NH, remarked that her third daughter will be in 6<sup>th</sup> grade this  
61 year. She is very excited to come back to school. She understands there is the option of VLACS,  
62 but that will not work. She does want her to come back to school, but she is vaccinated, and her  
63 daughter is not. Kids that are unvaccinated should be masked due to the Delta variant.

64 She is happy that Mont Vernon is case free and wants to keep it that way. As long as the kids in  
65 the school can be vaccinated then they can take the masks off. Her daughter cannot take her  
66 mask off it or else it will be really challenging. She thanked the board and administration for an  
67 exceptional year.

68 Ms. Ally Norman, Mont Vernon NH commented during the pre-Covid winter she had a  
69 Kindergartener at the Village School and a newborn. The risk from the flu was much higher than  
70 the same risk of Covid. Where does the public concern for the greater good for her newborn at  
71 the time. The answer is politics. They are in a difficult position. She knew that she was taking a  
72 risk and took precautions to protect her family. It is a double standard and does not make sense.

73 Masks are not a benign thing; it is a negative. Let the families best chose how to protect their  
74 own children.

75 Mr. Matthew Black, Mont Vernon NH, noted that he sent an email about the draft plan. He  
76 suggested to make masks required in the yellow status. These decisions are hard. What he tries to  
77 do with his children, is the consensus opinion of experts is a way to get to the answer. He  
78 suggested that they weigh the pros and cons. The CDC recommends masks indoors. He would  
79 like to suggest that the board do that.

80 Mr. Craig Wiley, Mont Vernon NH, mentioned that you are not going to make everyone happy  
81 no matter what. He asked them to keep in mind the following, 1. What is the metric that would  
82 tell them they are going in the wrong direction? They might be doing more harm than good. And  
83 2. How long are they going to socially distance, use masks, etc. He noted that he is also confused  
84 by this as well. To the kids at home, you are going to hear a lot about this stuff going forward.  
85 Don't let it stop living your life. There may be mental issues and it is not their fault if they feel,  
86 bad, depressed, lonely. They need to watch for warning signs.

87 Mr. Rob Levitt, Mont Vernon NH, noted that he approves of the plan as amended. He thanked  
88 the Board for what they had to go through on Thursday. He read through it and there is nothing  
89 that says that you cannot mask your child.

90 Mr. Andrew Stokinger, Mont Vernon NH, commented that he has three children. He wanted to  
91 amend the plan and hold vaccination clinics and masks all the way to green status. Both of these  
92 things it is a good idea because it reduces the burden on the teachers.

93 Mr. George Torres, Mont Vernon NH, mentioned he has a soon to be senior at SHS and 5-year-  
94 old. Right now, he is in support of the original safety plan. The high school was going green due  
95 to case count. His son will not wear a mask but not his daughter. She did attend a summer  
96 program and got sick for the final week, but now is going back to school and they are at a  
97 quandary. They should revert back to the original plan in yellow with masks.

98 Ms. Lawrence asked for further public comment.

99 There was no further public comment.

100 Mr. O'Keefe asked about the fluidity and the modalities and the weighting that you are assigning  
101 to the metrics.

102 Mr. Steel replied that he will start with the weighting is in priority order. There is not a weight  
103 assigned to each metric. The changes with Covid were happening so rapidly. He expects and  
104 anticipates that they will change and adapt this year as well. They have the ability to be flexible  
105 and will decide for each school, with common sense applied. They are applying different status  
106 levels to their different schools. That is a different change from last year where they were acting  
107 in concert.

108 In terms of fluidity, the hope is to make changes during the segment change. One lesson learned  
109 is that with Covid and the change in community metrics did not follow with the segments  
110 necessarily. It was difficult to for families to make those changes mid- segment. They have no

111 segments now which means they can move more fluidly. Their families need time for planning  
112 and hopefully they do have to do that. If they can wait till the end of the weekend or the end of  
113 the month, they would certainly do that. They would move as quickly as they had to. They would  
114 attempt to give their families as much lead time as possible but reserve the right to act quickly  
115 based on local conditions.

116 Our rate of active cases per 100,000 is significantly underweighted. The current listing of 400  
117 cases per 100,000 is equivalent to 10 cases in town. He suggested that they change the cases and  
118 multiplied by 10. They would probably not be concerned in MV unless they got to 100 cases in  
119 town

120 Mr. O'Keefe commented that they are in orange in three of their metrics and one in blue. If they  
121 had 2 cases, they would immediately fall.

122 Mr. Steel replied that with 200 students, more than 10% would be 20 kids in the school which is  
123 higher than any point last year. As he looks at the various status levels, he has a question about  
124 the number of active cases among their student body. He has noticed and the state's website has  
125 lagged by a few weeks. If they are in mid-September with no/few school cases, he would suggest  
126 that they move into green status despite the fact that there is no vaccination available.

127 Mr. O'Keefe asked if they moved school cases from blue to green or blue to yellow. He inquired  
128 how would that impact the overall status.

129 Mr. Steel replied, in his opinion, if they had 4 cases in the first week of school, which would  
130 make that indicator in yellow, there would be 4 in town at least. Yellow would be appropriate  
131 and is a low number compared to the school population. The 16 cases significant for the school,  
132 not the town. He would be comfortable moving the school to the orange status.

133 Mr. O'Keefe inquired about the two subsets, between yellow and orange status.

134 Mr. Steel replied that orange means that they would be doing everything they can to keep their  
135 in-person school environment open. They would be restricting movement throughout the  
136 building, moving lunch out of the MPR, have lower restriction to parents/guests and parent  
137 meetings would be done remotely, unless there is a circumstance. The difference is that orange is  
138 similar to last year's yellow in that they would do everything they can to restrict movement in  
139 the building and students outside the cohort during the day.

140 Ms. Clark asked about the vaccine availability.

141 Mr. Steel replied if the FDA emergency authorization for ages 5-11, he would say that 6 weeks  
142 from now, as they track accessibility, and there are no problems then it would move into green. It  
143 is not just that it is available but accessible and waiting till the inoculation takes into effect.

144 Ms. Hinckley noted that she sent her questions over chat and Mr. Steel had answered those.

145 Mr. Steel read Ms. Hinckley's questions that he answered previously.

146 Ms. Lawrence asked if Mr. Eckhoff was able to join.

147 Mr. Steel noted that Mr. Eckhoff was not able to join in the meeting.

148 Ms. Lawrence asked why would they want to differ from the guidance from experts.

149 Mr. O'Keefe remarked that they have passed this decision down to the local level so they can  
150 engage on the community basis. Over the summer, he was able to work on the task force to  
151 design and develop the reopening plan. They had great dialogue that was open and transparent.  
152 He was able to lead a team of the district's professionals and solicited their feedback over the  
153 course of multiple of sessions throughout the summer.

154 As a result, they delivered that feedback to the Superintendent where they then crafted the actual  
155 plan. Last week, members of the community provided feedback and potential changes for a  
156 better infusion and weaving into the community. Some members of the community believe that  
157 we failed and some that succeeded. That is why they are having that dialogue. They want to  
158 make a plan that is appropriate for them and their values as a community.

159 Ms. Lawrence asked for thoughts.

160 Ms. Clark added that she agrees, they need to follow the recommendations of professionals. That  
161 is where the comment was made to start in orange status, it is more in line with the  
162 recommendations nationally.

163 Ms. Lawrence asked Ms. Hinckley if she heard the conversation and if she had any comments.

164 Ms. Hinkley responded that she agrees with Ms. Clark. They should start the year with masks at  
165 least for the first two weeks and follow the CDC recommendations. The students have been  
166 traveling and with other children. If they can move away, so be it. Starting the year unmasked  
167 would be a mistake.

168 Ms. Lawrence asked the board if they start in orange or reincorporate masks in status yellow.

169 She asked if we make the shift to make masks required in status yellow or not.

170 Ms. Clark added that they had low cases with masks last year. The transition between remote and  
171 in person learning was stressful. She is leaning towards masks in yellow status.

172 Ms. Lawrence asked if they need to discuss status green.

173 Mr. Steel replied under 4 or 5 cases in the MVVS. Rate of active cases per 100,000 with an  
174 updated number of between 251 and 1,000 as a rate. That would work out in MV to be between 7  
175 and 25 cases in the whole town. Moving down the test positivity rate by health region between 1-  
176 3%, with combined tests, keeps us in green. There are different standards for herd immunity and  
177 that has shifted with time.

178 Ms. Lawrence asked about adjusted rates with status yellow. School case count of between 5-  
179 16/17 cases, rate of active cases per 100,000 which translates to 25- 75, test positivity rate of 3-  
180 5% and vaccination rate of 55-65%. Mont Vernon is just below that right now.

181 Mr. O'Keefe and Ms. Hinckley noted that they are comfortable with the adjusted numbers.

182 Ms. Lawrence noted that they will discuss masking in yellow. She is on the fence, however, there  
183 is data that supports both ways. They do not have enough information of pediatric masking. She  
184 asked what information do they follow.

185 Ms. Clark commented on using the correct cloth masks with the correct layers. Delta results on a  
186 little lag with the data. The best way to proceed is to go off of the best evidence. She asked are  
187 they going to give parents best practices. She would be happy to gather that information.

188 Ms. Lawrence added that they need to discuss masking as it affects those with speech and  
189 language disabilities.

190 Ms. Clark asked if they can provide masks with windows.

191 Ms. Lawrence noted that they need to come to a decision about status yellow.

192 **Mr. O’Keefe motioned to modify the plan adopted by the SAU School Board to require**  
193 **masks at the yellow status. Ms. Clark seconded the motion.**

194 Ms. Lawrence asked for discussion.

195 Mr. O’Keefe commented that they are limited with the layers of mitigation, class sizes, socially  
196 distancing and cleaning capabilities. He believes that masks work, he wears them every day he  
197 children noted that they will wear them to protect other people. It has been extremely polarizing  
198 on both sides and people’s minds are pretty much made up. The tough decision is to eliminate  
199 yellow and keep the status quo or modify. He noted the importance for mask breaks, and he  
200 supports the amendment and the change.

201 Ms. Clark commented that there is a nursing shortage in the state. She agrees in enhancing the  
202 social and emotional support with a plan.

203 Ms. Lawrence asked about the exemption process.

204 Mr. Steel replied, either a disability identified by the IEP team or by a doctor’s note that states  
205 that a mask would not be in the child’s best interest. One difference from last year, the remote  
206 option was available, this year it is very different and less connected to the school. As such, they  
207 need to adhere to the policy, that is still in effect, that was written by legal counsel.

208 Ms. Lawrence inquired about social emotional wellness if the child was struggling.

209 Mr. Steel responded that they are not in the position to question the medical diagnosis by a  
210 doctor that is licensed in the State of NH.

211 Ms. Hinckley mentioned there were no comments.

212 Mr. Eckhoff commented that as a board they are plugged into the day to day and concerned  
213 about being preventative. They can decide tonight and be back here in 48 hours to make a  
214 change.

215 Ms. Lawrence noted that Mr. Eckhoff will not be able to vote because he did not hear all of the  
216 discussion.

217 Mr. Eckhoff replied that he understands.

218 Ms. Lawrence asked Ms. Hinckley if it was unreasonable for her to be here and if she is alone.

219 Ms. Hinckley responded that it was unreasonable to be there, and she is alone.

220 **Ms. Lawrence called a Roll call for the amendment to add masks in for status yellow:**  
221 **Clark-Yes, O’Keefe- Yes, Lawrence-Yes and Hinckley- yes. Amendment passed.**

222 **Mr. O’Keefe motioned modify the rates. Starting with the red status, it would be greater**  
223 **than 4,000, Orange will be 3,001 to 4,000, Yellow will be 1,001 to 3,000, and green would be**  
224 **252 to 1,000 and blue would be 0 to 250. Ms. Clark seconded the motion.**

225 Ms. Lawrence asked for comments.

226 Mr. O’Keefe noted that they wanted to take into account everyone’s concerns. From their  
227 perspective it was a more organic way to address their concerns.

228 Ms. Lawrence asked Mr. Eckhoff if it was unreasonable for her to be here and if he is alone.

229 Mr. Eckhoff responded that it was unreasonable to be there, and he is alone.

230 **Ms. Lawrence called a roll call: Clark-Yes, O’Keefe- Yes, Lawrence-Yes, Eckhoff- Yes and**  
231 **Hinckley- Yes. Motion passed.**

232 Mr. O’Keefe asked that the Superintendent give monthly notices or updates in terms of where  
233 they are at in the overall matrix.

234 Mr. Steel replied that he would be happy to.

235 He asked Principal Lecklider to work with Facilities Director, Mr. Roger Preston to scope out  
236 spaces and their Business Administrator, Ms. Facey to see if ESSER funds are available. They  
237 will work on this into September.

238 **Mr. O’Keefe motioned to adopt the reopening plan as amended.**

239 Ms. Lawrence asked for discussion.

240 There were no further comments.

241 **Ms. Lawrence called a roll call: Clark-Yes, O’Keefe- Yes, Lawrence-Yes, Eckhoff- Abstain**  
242 **and Hinckley- Yes. Motion passed (4 and 1 abstention)**

243 **Mr. O’Keefe asked if the mask policy will apply to everyone in the building.**

244 Mr. Steel replied yes.

245 IV. Consent Agenda

246 Ms. Lawrence asked for questions on the consent agenda.

247 Mr. O’Keefe added that he would like to pull items #4, #5 and #6.

248 **Mr. O’Keefe motioned to approve items 1. June 14th, 2021 Draft Minutes, 2. July 14th,**  
249 **2021 Draft Minutes and 3. July 15th, 2021 Draft Minutes. Ms. Clark seconded the motion.**

250 **Ms. Lawrence called a roll call: Clark-Yes, O’Keefe- Yes, Lawrence-Yes, Eckhoff- Yes and**  
251 **Hinckley- Yes. Motion passed**

252 Mr. O’Keefe asked if they are caught up to speed with the budget items listed in item #4 MVSD  
253 FY 23 Master Budget Calendar

254 Ms. Facey replied that it is part of the budget creation process and they have internal budget  
255 reviews.

256 Mr. O’Keefe asked who was working on the staffing plan.

257 Ms. Facey replied Ms. Landwehrle, and she does not believe there were changes. If there are any  
258 adjustments, they have the ability to adjust that.

259 She asked to have the budget members identified. She can send out dates once they have  
260 members identified. She noted that she has not heard from MVSD Moderator, Mr. Peter King.

261 Ms. Lawrence asked the board to look at the subcommittee dates. Email her and she will get  
262 back to Ms. Facey.

263 Mr. O’Keefe asked about #5 MVSD June-July Facilities Update. There is siding that is cracked.

264 Mr. Preston added that they will be addressing those.

265 Mr. O’Keefe inquired about the gutters over the door by the second grade.

266 Mr. Preston added that those are being replaced as well.

267 Mr. O’Keefe inquired if they could buy umbrellas for the picnic tables and wrap them up at  
268 night.

269 Mr. Preston replied that he will work on that with Principal Lecklider.

270 Mr. O’Keefe asked if after the pump was replaced, if everything was ok with the well.

271 Mr. Preston replied that they chlorinated it and flushed the entire building for two days. Once  
272 that dissipated, they tested, and everything came back ok.

273 Mr. Steel noted that the community has supported them with putting away \$50k. The roof project  
274 was exciting, they saved money for it and worked out well. The next project on their list is the  
275 HVAC upgrade. Mr. Preston has gone through the entire process and they used some year end  
276 funds and some grant funds to do the HVAC design work, HVAC design and investigation work.

277 They have identified the duct work in all of the ceilings is the primary thing that will need to be  
278 replaced at some point. That bid that they got came back around \$215k. Our plan was to do that  
279 two or three years from now. They knew the roof bid came back under what they had budgeted  
280 and thought it was worth investigating. They are looking for some direction.

281 Your options are to follow the plan and when they have funds available do the work. Another  
282 option would be to accelerate the plan with ESSER funds, that are not needed for supportive  
283 remote students, and do the project next summer. Or attempt to do the project over the summer,  
284 and some of the additional items that put them over their budgeted amount but are things that  
285 should be done at some point into the future.

286 Mr. O’Keefe asked about the balance of the trust.

287 Ms. Facey replied, in the trust now is \$361k and the roof cost was \$211k. In ESSER 2 there is  
288 about \$19k and in ESSER 3 there \$98k. They are not sure what they potentially need to use of  
289 those funds.

290 Mr. O’Keefe asked about the total cost, he noted that he sees 4 numbers.

291 Mr. Preston replied that it was broken down.

292 Mr. Preston recommended doing only the duct work.

293 Mr. O’Keefe requested to come up with a prioritized list.

294 Ms. Lawrence agreed.

295 Mr. Steel noted they will have a memo next month with a list.

296 Ms. Facey added that they will also have a better understanding of the ESSER funds.

297 Ms. Lawrence asked Mr. Eckhoff and Ms. Hinckley for other questions.

298 Mr. Preston noted that the vendor completed the RFP in three phases. Lastly, in the July update  
299 he added the 5-year plan.

300 Mr. O Keefe asked about the changes or updates on the #6. MVVS Student Handbook.

301 Assistant Superintendent, Ms. Christine Landwehrle, replied that she has updated the school  
302 times and any of the procedures that we have been updating. Our policies have additional  
303 references and they have added the approach to behavior and discipline.

304 Mr. Lecklider commented that it is a pleasure to be here and he has been welcomed. It is an  
305 honor and privilege to serve this community. The MVVS is the pride and joy of this community.

306 A couple of things, first what is their theme for the year. *“It takes a village to soar together”*  
307 which is showing respect, others first, always safe and responsible citizens. Through his  
308 interview process, it became evident there are strong themes, community, mission of engaging  
309 challenging and supporting each learner, they are passionate, looking at the whole child and it is  
310 important that it is one of our focuses.

311 He noted that he has a number of chats with the staff and put a survey out to the community with  
312 positive authentic feedback. Tonight, just before this meeting they had a meet and greet. It was a  
313 nice turn out and great to meet some of the students.

314 He thanked staff for their summer work on the Title I Program. They have collaborated with  
315 ASD and staff were very excited to be back

316 He would like to thank the PTA and they have exciting plans this year with the mascot a  
317 Welcome Back breakfast for staff on the first day.

318 Ms. Lawrence asked for questions. She asked if there will be a contact list in the handbook.

319 Ms. Landwehrle noted that it might be the most appropriate on the website, live if changes  
320 needed to be made. She can include that in later versions.

321 **Mr. O’Keefe motioned to approve items #4. MVSD FY 23 Master Budget Calendar, #5.**  
322 **MVSD June-July Facilities Update, and #6. MVVS Student Handbook. Ms. Clark**  
323 **seconded the motion. The vote was unanimous, motion passed.**

324 No discussion

325 **Ms. Lawrence called a roll call: Clark-Yes, O’Keefe- Yes, Lawrence-Yes, Eckhoff- Yes and**  
326 **Hinckley- Yes. Motion passed**

327 V. Social Emotional Updates

328 Mr. Steel remarked that they did not have it prepared but will have an update and email the board  
329 in the next couple of days.

330 Ms. Landwehrle added that they did hold their Summer Reboot program with team building  
331 activities and a scavenger hunt. They had them in grade level groups and got to connect with the  
332 remote and other teachers. It was really positive. They are looking at grant funds for anti-  
333 bullying and harassment curriculum. They are waiting on submitting approval of their grant and  
334 are excited to be reconnecting with Second Step.

335 Mr. O’Keefe requested to craft a plan on how to engage students. Additionally, have it available  
336 so it is noticed by members of the community and they can access who to reach out to. He knows  
337 that it exists already but so that the faculty and staff are brought up to speed.

338 Ms. Clark asked about kids that have accommodations, were there plans from last year.

339 Ms. Landwehrle replied that they have an in-service day on Friday and then opening day. It ties  
340 in with the mask policy and adjust as needed.

341 Ms. Lawrence asked about responses to his survey.

342 Principal Lecklider replied that he is getting a lot of responses to his survey.

343 The Board thanked Principal Lecklider.

344 VI. Public Comment II of II

345 Mr. Greg Wiley, Mont Vernon NH, commented that they have a great Principal. The MVVS is  
346 luck to have him.

347 Mr. Steel noted that there are 3 nominations.

348 Mr. Eckhoff suggested that K-6 students could design t-shirts that they can buy even as a fund  
349 raiser. They can narrow it to three designs, and they can wear it to school. It can engage the  
350 students in a positive practice in the first week of school.

351 Mr. Lecklider replied that he has already had conversations with Ms. Tighe. There is a design  
352 already mocked up and the wheels are moving quick. They will also need to name their falcon.  
353 He is excited to give them updates and it will be great to rally around.

354 Mr. Eckhoff asked about the outdoor learning areas. He suggested more permanent areas that are  
355 covered with accommodations for 20-22 students.

356 Mr. Steel noted that Mr. Lecklider and Mr. Preston will report back on that soon.
