

Sneakers Wanted!

Hello!

As we enter in the winter season, many students are wearing boots to school on the day they have physical education. While it is not very comfortable to actively move in boots, it can leave marks on the floor as well as be a safety concern. I am asking that families consider donating NEW or GENTLY USED athletic sneakers. If you would like to help with this, we could use shoes for ages 5 through 10. This would provide students with the opportunity to participate comfortably in physical education on days they forget sneakers. Thank you for considering this benefit for our students!
